Personal Statement

A results-driven IT graduate with hands-on experience in web development, networking, and user support. Passionate about leveraging technology to solve real-world problems. Below are my core capabilities and achievements:

- **Front-End Web Development-** Proficient in building responsive user interfaces using HTML5, CSS3, Bootstrap, JavaScript, and React, ensuring cross-browser compatibility and performance.
- **Analytical Thinking-** Strong ability to assess system requirements and provide effective solutions that improve user experience and functionality.
- **Version Control and Collaboration-** Skilled in using Git for source control and team collaboration in a fast-paced development environment.
- **Adaptability and Initiative-** Demonstrated ability to multitask and manage responsibilities efficiently during internships and project-based roles.

Skills

- HTML/CSS and Vanilla Javascript(ES6+)
- TypeScript
- React Framework
- Next.js
- React Native
- Angular
- Responsive Design
- Git Controls
- User Interface
- REST API and GraphQL
- Tailwind and NativeWind
- Application of PWA
- TurboPack, Webpack and Babel
- Agile Methodologies
- MS Office Suite

Education

2019 September- 2023 December

Bachelor of Science in Information Technology

Kabarak University |

CURRICULUM VITAE

2023 January – 2023 August

Responsive Web Design Certification
FreeCodeCamp |

2025 May – 2025 October

Front-End Web Development
ALX AFRICA |

Professional Experience

Smart Applications International – IT Intern (Smart Insure Team)

April 2024 – April 2025

My main role as an intern was to first familiarize myself with the technologies used by the company in developing its systems, and then apply them to complete project-based assignments assigned by my Project Manager. Here are some of my achievements during that period:

- **Designed and implemented responsive** user interfaces using HTML5, CSS3, and JavaScript, improving user accessibility and usability across mobile and desktop devices.
- **Developed and integrated dynamic web** components using Angular, enhancing system interactivity and reducing page load times by an estimated 20%.
- **Conducted cross-browser testing** across Chrome, Safari, and Firefox to ensure consistent functionality, resolving UI/UX bugs during testing.
- **Utilized Git for version control**, contributing to a team of developers in an Agile environment and maintaining clean, trackable codebases.

Nakuru County Government – ICT Assistant, Revenue & Tax Collection Department

January 2023 – November 2023

- **Provided technical support to staff members**, resolving routine and complex hardware/software issues to ensure minimal downtime.
- **Processed market bills, licenses, and business permits using internal systems**, supporting timely service delivery to local citizens.
- **Installed and updated software/drivers for computers and printers**, improving system performance and reducing maintenance requests by 30%.
- **Configured and maintained the Local Area Network (LAN)** for the department, ensuring stable connectivity for our workstation.
- **Assisted in the troubleshooting and repair of printers and peripheral devices**, extending equipment lifespan and reducing replacement costs.

Davis and Shirliff Company – Dispatcher, Service Marshalling Department

May 2019 – January 2020

- Verified the accuracy and completeness of over 100 products before dispatch to the logistics department, ensuring that deliveries met customer requirements.
- Assisted in inventory tracking and coordination with warehouse teams, helping streamline the order fulfillment process.

CURRICULUM VITAE

Personal Projects

MOVIE APP

I developed a real-time movie and TV show application that updates automatically with the latest releases. I did this as part of my completion of the ALX Pro Dev Frontend program. Below are the technologies I used and what I was able to achieve:

- I built it using React Native and Next.js (TypeScript) for cross-platform support.
- I styled it with Tailwind CSS and NativeWind.
- I integrated the TMDB API via Axios to fetch and display dynamic movie data.
- I implemented a functional search bar and “add-to-list” feature for user interaction.
- I designed a clean, user-friendly interface optimized for mobile use.
- For copyright compliance, the app redirects users to licensed streaming providers instead of hosting media directly.

Below is the link where you can download the app and interact with it:

<https://expo.dev/accounts/collins005/projects/movie-app/builds/6e78ad05-926e-44e3-a53b-a78b1bcd472>

PRE-INSPECTED USED CARS(Ongoing Project)

I am Currently developing an e-commerce web platform that enables users to browse and purchase certified pre-owned vehicles online.

- It aims to eliminate middlemen and reduce scams by ensuring transparent, verified car listings.
- It is focused on providing users with detailed vehicle inspection reports and fair pricing.
- I am building it using Next.js, React, and TypeScript for scalable frontend functionality.
- I am styling it with Tailwind CSS and standard CSS.
- I am using PostgreSQL as the main database, Better Auth for authentication, and GraphQL for vehicle data management.
- I intend to integrate Progressive Web App (PWA) features for seamless multi-device performance.
